PROFESSIONAL SUMMARY: Aspiring Artificial Intelligence & Data Science student with hands-on experience in web and mobile application development, data analysis, machine learning, responsive UI implementation, and visualization, eager to contribute to business growth by delivering data-driven insights and impactful solutions.

INTERNSHIPS AND PROFESSIONAL TRAINING

EY Global Delivery Services & AICTE (Next Gen Employability Program) | Mar 2025 – Apr 2025

- Completed a 6-week training program on **web development using the MERN stack**.
- Developed a mini project - a **Collaboration Tool** with login, real-time components, and functional UI.
- Strengthened **problem-solving, debugging, and implementation skills** through hands-on practice.

Deloitte Data Analytics Internship | February 2025

- Performed data cleaning, analysis, and visualization on business datasets in a Deloitte simulation environment
- Generated insights and interactive reports from business datasets to support analytical decision-making workflows
- Built interactive dashboards to improve data interpretation and reporting efficiency

Tridev Technologies - Web Development Intern | Oct 2025 – Dec 2025

- Worked on a **hospital management system** handling patient records, pharmacy data, and hospital operations
- Managed OPD/IPD records, prescriptions, and hospital resource data across multiple system modules using SQL
- Built web modules with admin access control and used **Git/GitHub** for version management

Apsis Solutions - Mobile App Development Intern | Feb 2026 – May 2026

- Improved application usability and data handling efficiency by 15% through responsive UI components
- Integrated database functionalities and implemented features for efficient data management
- Participated in debugging, testing, and collaborative development using Git and GitHub

PROJECTS

Trader Performance vs Market Sentiment Analysis

- Examined 200K+ trades using Python to study **performance vs Bitcoin Fear/Greed sentiment**
- Performed **EDA, data cleaning, and feature engineering**; merged trading and sentiment data
- Evaluated **PnL, win rate, trade frequency, and position size**

Causal Inference on Infant Health Dataset

- Conducted **EDA, data cleaning, and feature engineering** to analyze factors influencing infant health outcomes.
- Applied **CI techniques** including **Propensity Scores and IPW** to derive causal insights beyond correlation.
- Built an **interactive Streamlit dashboard** to visualize causal effects and model outputs, automated updates using **GitHub Actions (CI/CD)**.

Sign Language Classification Using Convolution Neural Networks

- Built and trained a **CNN-based image classification model** on the MNIST dataset to recognize hand gestures (A–Z).
- Performed **EDA, image preprocessing (normalization, reshaping)** and model evaluation using Python.
- Achieved **~95% classification accuracy**, creating a base for **real-time sign language interpretation systems**.

SBAMS Parent Application (Student Bus and Attendance Monitoring System)

- Designed and expanded a parent application for **monitoring student bus attendance and tracking information**
- Implemented features for attendance updates, notifications, and student data management
- Integrated responsive UI components and supported **database handling and application testing**

EDUCATION

- Don Bosco Institute of Technology — B.E. Artificial Intelligence & Data Science
Sept 2022 – Present | CGPA: 7.8 | Expected Graduation: 2026
- Maharani Lakshmi Ammani College for Women — PCMC (Physics, Chemistry, Mathematics, CS)
Completed: 2022 | Score: 76%

TECHNICAL SKILLS

- Programming: **Python, SQL, HTML, Microsoft Excel.**
- Data & Visualization: **Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Power BI, Tableau.**
- Tools: **Git, GitHub, NumPy, Pandas**
